INNOVATE CODE CONQUER

codeXcaliber

INNOVATE, CODE, CONQUER

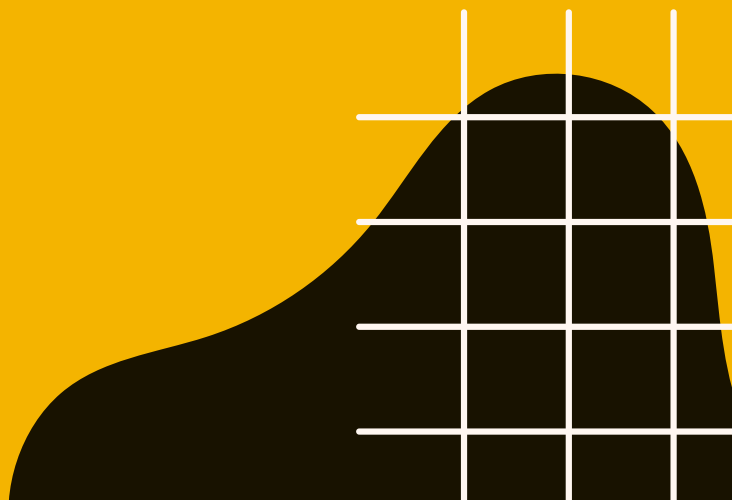

Organized by **GDG IIITN (Google Developer Group, IIIT Nagpur)**, **CodexCaliber** is an exciting hackathon inspired by the spirit of Google Summer of Code (**GSoC**). As a student-led initiative, GDG IIITN aims to foster creativity, collaboration, and open-source contributions through this event, empowering students and developers to showcase their skills and make a real-world impact.

Why CodeXCaliber?

- **Collaborate:** Work on real-world projects under the guidance of experienced mentors.
- **Compete:** Solve impactful problems and compete for prizes, recognition, and career-enhancing opportunities.
- **Contribute:** Advance the open-source ecosystem with meaningful contributions.

About GDG IIITN:

GDG IIITN is a vibrant community of developers and enthusiasts passionate about learning and building innovative solutions. Our mission is to create opportunities for students and developers to grow their skills, collaborate with like-minded peers, and connect with the global tech community. Events like CodxCaliber showcase our commitment to fostering a culture of innovation and technological excellence.

WHAT TO EXPECT

1. PROJECT BUILDING

- Pitch innovative ideas or contribute to open-source projects.
- Work on impactful solutions addressing real-world problems with practical applicability.

2. MENTORSHIP

- Collaborate with experienced industry experts and domain leaders.
